INTRODUCTION

Accurate Info Soft Pvt. Ltd. an ISO 9001:2000 company is a premier Software development company with a reputation for quality, superior technical skills and High satisfaction of Customers. We have strong experience in designing, developing and implementing custom business analytical solutions using latest available technologies

Incorporated in 1995, AISPL has been offering customized software solutions for various commercial applications. With the changing trends in technologies and the growing software expectations, we diversified our zone of products & services to meet the requirements of customers from diverse industries.

We have a dedicated state of art software development center in New Delhi India, with a team of highly motivated IT professionals having extensive domain knowledge with ability to innovate and a strong desire to excel.

Our competitive edge is the combined strengths of our people, processes and technology (PPT). These strengths give us the advantage of delivering strategic value through operational efficiency, and providing cost effective, accurate, timely solutions

We believe in complete solutions. We endeavor to provide end to end solutions to our customers which makes their work easier, more efficient and more cost effective. Our systems are extremely easy to implement, maintain and upgrade.

VISION

- ✓ To be a leading software development company across the globe
- ✓ Invent new solutions, define new markets and offer services that are the best in their class
- ✓ Deliver solutions to customers which helps them meet their business goals by making their work easier and more effective

Administrator Plus

Administrator Plus an integrated new generation hospital management software which converges latest technology and your administrative process to manage work process within the hospital. This is designed for multi-speciality hospitals, to cover a wide range of Hospital administration and management processes. It is an integrated client server application which uses microsoft technologies as Front End and Flexible back end (like Oracle, SQL, etc).

Administrator Plus streamlines and integrate the operation processes and information flow in the hospital to synergies the resources namely men, material, money and equipments through information.

It performs core hospital activities and increases customer service thereby augmenting the overall Hospital Image. ERP bridges the information gap across the hospital

Administrator Plus eliminates the most of the business problems like Material shortages, Productivity enhancements, Customer service, Cash Management, Inventory problems, Quality problems, Prompt delivery, Pilferage, TPA Billing etc.

Benefits

- ✓ Helps in efficient management of the hospital.
- ✓ Enhance patient care
- ✓ Improve work efficiency
- ✓ Improve financial control
- ✓ Eliminate the chances of any pilferage
- ✓ Lesser dependency on lower and middle management

Modules

Reception & Patient Management

Reception is the first point of interaction for anybody coming to the Hospital. It has all the information of the patients, doctors, departments and activities of the Hospital. All enquiries and appointments are scheduled through this module. All information available here are in real time and any enquiry about the patient status, Room Status, Doctors availability or tariff's for various services is on actual status since the data is constantly updated.

Patient Registration

Every patient who visits the hospital has to get registered prior to getting any consultation, treatment or investigations done. Registration of patients involves accepting certain general and demographic information about the patient. The patient is allocated a unique Registration number and a Patient Identification number. The Patient ID will remain same for his all subsequent visits to the hospital whereas he will be allocated a new registration number on every visit. The consultation charges (if applicable) can also be collected for the OPD patients during registration and a receipt will be generated.

Modules

OPD Billing

For billing of any OPD service like Pathology Tests, or any imaging investigation, the patient moves to OPD billing counter. Here the services are charged as per the rates already defined for various categories/penal/ time etc to the patient with his Patient ID. The Payment is collected for the service provided and a receipt is generated. This module works as an interface with the diagnostic modules. All services will be automatically entered into the respective modules wherever required like lab & Imaging reporting.

Indoor Patient Management

The Indoor patient module commences when the patient is being registered and allotted a bed in the ward. It deals with the complete treatment and services provided to the patient during his stay in the hospital. This module works at the nursing station. During his stay in the hospital, every patient is provided various services in terms of consultants visits, investigations, procedures, medicines & consumable, room services, diet, etc. All these services are entered online to the patient record through nursing station. It also interacts with the Investigation module, Store, Pharmacy and sends the requisitions to these departments. This data serves as major input for the IPD billing.

Indoor Billing

Indoor billing module has a supervisory role. The entries for billing are automatically transferred to the patient bill by the respective departments, which provide the service. The services are charged as per the category/panel/package applicable. Here the bill is compiled and the payment collected from time to time. Provisional and Final bills are generated which provides complete information about the Services availed, its Charges, Advance collected, appropriate Receipts, Refunds, Credit notes, Concession allowed, etc.

Investigations Reporting (Pathology & Imaging)

In the routine functioning of a hospital, various types of investigations are carried out. Carrying out number of tests and making the results available promptly is very crucial for assessing the patient's medical status and deciding on the further course of action. The investigation requisition can be auto-generated (through OPD billing or IPD) or can also be generated here, depending on the system followed in the hospital. The tests parameters are pre defined with the interpretations & formulae wherever applicable. The test results are entered into the software manually or with equipment integration and a descriptive smart report is printed after verification and validation.

Payroll

Keep track of all staff member's attendance; their leave record and deductions. Generate salary slip and other related reports.

Modules

Inventory Management

This module deals with the inventory of all Hospital Equipments, Materials, Consumables, Medicines, Implants & Asset items in different departments of the hospital along with their purchase and supplier details. Requisitions for different items/equipment are sent to this store from different departments and accordingly the Central Store issues items/equipment to various departments and generate purchase orders for purchases. This also maintains records of purchases, stock, and supplier list, Item/equipment/material master tables. The Store module ensures that there is a round the clock availability of a sufficient quantity of drugs and consumable material for the patients in a mode that neither hinders efficient clinical work, nor it becomes a threat to the survival of the Store.

Pharmacy

The Pharmacy Module deal with the Retail Sale of medicines to OPD patients and Issue of medicines to the In-patients in the hospital. Its function includes, online drug prescription, inventory management and billing of drugs, consumables and sutures. This module is closely linked to the Billing Module and In-patient Module. All the drugs required by the patient can be indented from the various sub stores.

Financial Accounting

A Financial accounting module is linked with hospital billing module. You get online accounting of all revenue generated along with expenses incurred. There is no need to enter the revenue entries as they are already fetched from the billing module. All relevant information for the staff salary/wages, consultant share, etc is available.

Medical Record data (MRD) Management

Patient's Medical record data is critical for the analysis and research purposes. This data includes patient history, observation, diagnosis and therapeutic conclusions along with the tests details and serves as a source of information for any analysis and research. The purpose for this module is to utilize the patient's medical information and use it for analysis thereby improving patient care.

MIS Reports

This is a unique tool in the hands of top management. This module shows a screen where all current activities in terms of revenue are displayed and this screen is refreshed automatically after every 10 seconds. Simply saying, by looking at this screen, top management can find out the collection of various departments in OPD & Indoor, Outstanding of General and panel patients, No. Of admissions, Discharge of the day and so on.
